

Safety Baton

PolyBrite's LED Baton offers the most professional and advanced illumination for signaling on the market. PolyBrite's unique polymer/LED combination used in the baton is visible up to one mile and provides unsurpassed battery life.

The waterproof, three-way function switch and large glove friendly button make this the ideal tool for illuminating, signaling, directing and marshalling. The Baton is lightweight, extremely durable and safe to operate in adverse weather conditions.

Ideal for and used by Military, Police, Airport, Marine, Auto Emergencies, Road Construction Crews, Parking Attendants and Pedestrian Safety personnel for directing traffic and capturing attention.
